HTML/CSS Project: **Broadway**

Pro Cheat Sheet: Creating HTML elements, styling with CSS

CSS

To reference an HTML element with a class of `banner` :

```
.banner {  
}
```

Change the background color of an HTML element with a class of `banner` :

```
.banner {  
    background-color: #FFFFFF;  
}
```

Change the background image and size of an HTML element with a class of `banner` :

```
.banner {  
    background-image: url(the-link-to-the-image-goes-here);  
    background-size: size-options-go-here;  
}
```

To display `` HTML elements (within a `` HTML element) on one line:

```
.ul-class-name li {  
    display: inline;  
}
```
